

HealthCare Applications Services

Bringing Technology Into Healthcare

Engineering, Design and Development

- New Features development and Releases management
- Defect resolution and management
- CI/CD enabling in Development process

OUR HEALTHCARE SERVICES

Full Testing Services

- Development and Implementation of QA and test strategies
- Functional testing
- Database testing
- Performance testing
- Security testing
- Scalability and compliance testing
- Mobile Healthcare, BI/Analytics and Cloud migration

Test advisory

- Processes
- People
- Tools & Technology

WHY TMA

More than 12 years of
experience in developing/testing
healthcare applications

Deep domain knowledge on
healthcare and Pharmacy
applications workflows

Easy to scale with large
resource pool

Updated and familiar with all
ongoing changes and regulatory
compliances in healthcare industry

Cost reduction with effective
automation strategies, optimized
test approach

Faster time to market with
high quality

Technologies

- Domains: Health care, Aged care, Nursing home care, Medication scripts, Drug Administration System
- Compliance standard: HL7, HIPAA, ICD-10, DICOM
- Key Functions:
 - ▶ Hospital chain management systems
 - ▶ Pharmacy chain management systems
 - ▶ Both financial and nonfinancial applications for healthcare industry
 - ▶ Patient management and outpatient applications
 - ▶ Clinical Decision Support System (CDSS)
 - ▶ Compliance solutions

Frameworks and Solutions

- TMA Automation Framework, Robot Automation Framework, TMA Automation Analysis Tool
- Design Solution:
 - ▶ Languages and Frameworks: Microsoft .Net, Microsoft Azure Cloud, C/C++, Python, SQL service
 - ▶ High Availability Solutions
 - ▶ Cloud/NFV Enabled
- Standardized CI/CD model: Jenkins, Pipelines, Docker, Continuous Testing

Tools

- Testing tools: Atlassian Suite (JIRA, Confluence, Crucible, BitBucket), Jmeter, Selenium, Wireshark
- Security tools: Nessus, OWASP, NMAP, BurpSuite, Accunetix, Kali Linux (Linux penetration testing tools)

CASE STUDY

Healthcare Application Development and Testing Services

Description

Provide A Medication Management solution to provide Doctors and Pharmacists the ability and communication to take care of patient's based Medication profiles. Then, Nurses can take care patient Dose time

Services

Design, Develop, Cloud Deployment and Testing

Technologies

Microsoft .Net technologies (C#, ASP.NET, MVC 5, Web API, NHibernate, Actofac)
Microsoft Azure Cloud, Storage, web roles, SQL service, TFS, Web development (.NET framework), Window service application, Web automation Katalon, Jenkin, Teamcity
