Bring mobile technologies to restaurant

[www.tmasolutions.com](http://www.tmasolutions.com)

# Issues of Paper Menu

- ✓ Hard to show pictures and ingredients
- ✓ Hard to update
- ✓ Hard to support multi-language

# Our Solution

## visualMENU

Make your restaurant difference by using iPad or cheap Android tablets to show menus, food photos and descriptions in different languages.

Framework to turn tablets to a self-service machines in your shops or stores. ***Only your app on the tablet. No Web Browser or Game can distract your staff or customers.***

# Benefits

- ✓ **Increase customer satisfaction by reducing waiting time, visual menus and multi-languages**
- ✓ **Increase productivity and efficiency by automate communication between chef and waiters**
- ✓ **Host in cloud. No server needed.**
- ✓ **Pay per use**
- ✓ **Web page for restaurants to update menus from anywhere**

# Main Components (1/2)

## ✓ The solution includes 3 components

- Android app: Waiter
- Android app: Chef
- Web app: Admin

# Main Components (2/2)

1. **Tablet application for waiters to show food photo and description, take order, see waiting list and get messages from the chef**
2. **Tablet application for chef to get order, see waiting list and notify waiters**
3. **Web application for restaurant manager to update menus**

# Waiter app screenshots: Login

- Enter user name and password, select language

# Waiter app screenshots: Main menu

- Data from server or local (if no Internet connection)
- User can select a Category or view Order List

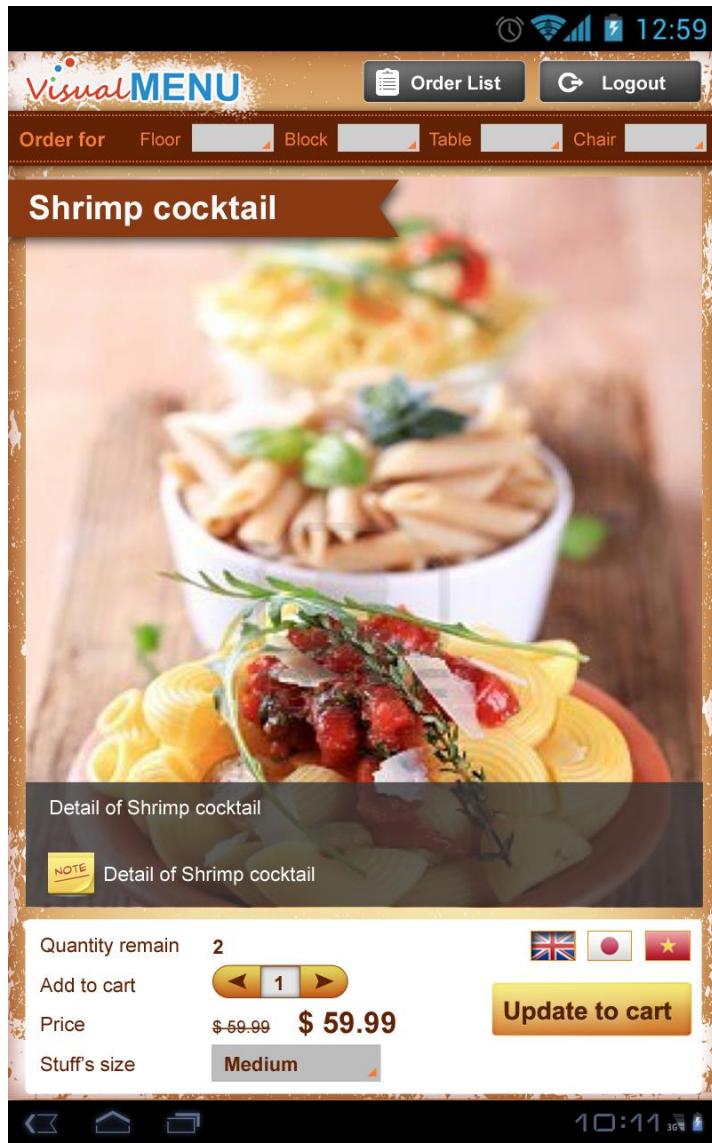

# Waiter app screenshots: Dish List

- Select a Category to view dish list
- Tap a dish to view details

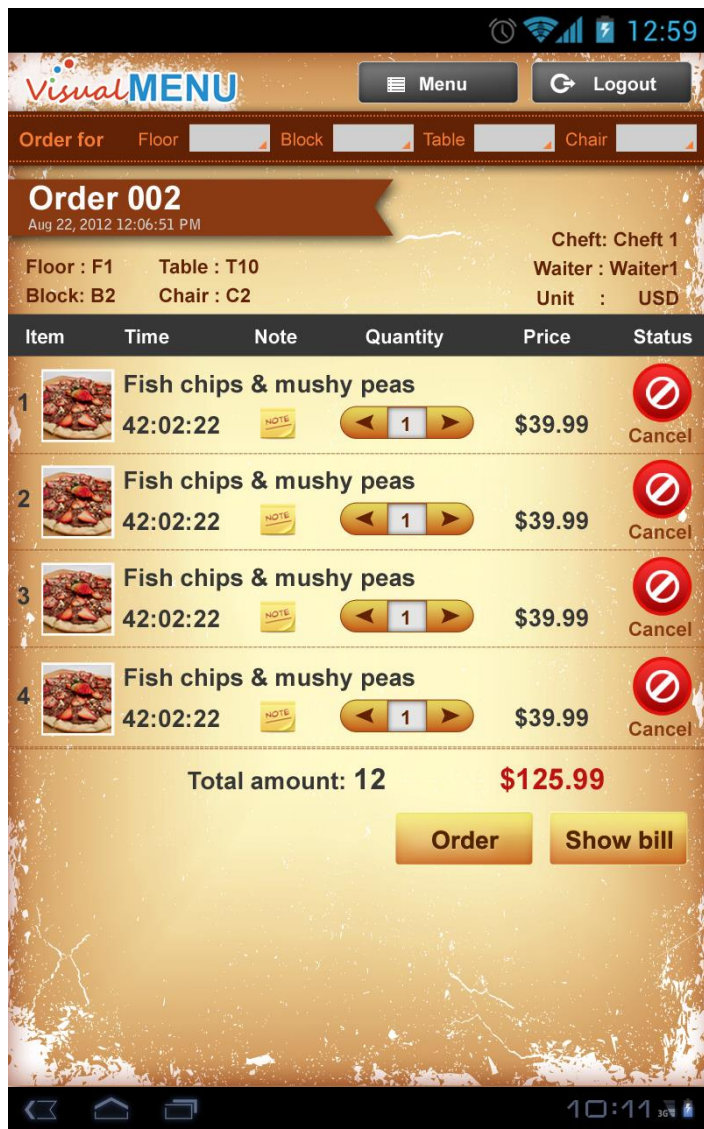

# Waiter app screenshots: Detail screen

- Select a dish to view detail information, including image and description
- User can slide to see the next or the previous dish
- Tap Order and send info to Chef app immediately (by push notifications)

# Waiter app screenshots: Order screen

- Display a list of ordered dishes with status
- User can cancel an order then the Chef app will be notified

# Chef app screenshots

- Display ordered list
- Chef can tap a dish to change status from **COOKING** to **COOKED**. Notification will be sent to Waiter app

# Restaurant Manager app screenshots (1/3)

- Restaurant manager can access via any Web browser, from PC or tablet
- Add, change or delete a dish/drink or a category
- Upload pictures
